

RENTAL TRANSFORMER

RENTAL SERVICES

We stock oil cooled & dry type Transformers of varied ratings and voltage ratios to cater the emergency requirement and need organizations. Rental / Service Transformers are generally provided during major breakdown of transformers or outage taken by client for maintenance of the transformer.

Transformers available:

315KVA to 2MVA; 11, 22 & 33KV Primary; and 433V Secondary voltage.

Emergency need can arise at site in case of Failure of existing transformer or outage taken by client for maintenance of the transformer.

Client needs to specify requirement of KVA; voltage ratio, type of transformer (Dry/Oil cooled), Terminal arrangement, Indoor /Outdoor use & site address. Transportation, octroi & unloading at site to be done by client. Our service Engineer will visit site at the time of commissioning. Initial security deposit is to be Paid in advance. Monthly rental charges are applicable. After use the client has to return the transformer in healthy condition at our premises.
